**PRESS RELEASE**

Sainte-Croix, August 2016

**New software solution by BARTEC SYSCOM – Syscom Cloud Software (SCS)**

BARTEC SYSCOM is proud to launch its new and fully integrated data empowering software for MR3000 product lines, the SCS Syscom Cloud Software (<http://scs.bartec-syscom.com>).

MR3000 instruments for vibration monitoring having all the latest communication technologies available, data retrieval and processing is becoming more and more important with handling ease and reliability as mandatory conditions.

In order to fulfill these needs and offer a completely integrated solution from data acquisition, retrieval, management and information processing, the professional and easy to use solution provided by the SCS is a perfect match.

Fully designed by Bartec Syscom and dedicated to civil engineering vibration monitoring, the SCS is operating like a Software as a Service (SaaS) platform, providing all the benefits of such model.

Its main features include plug & play M2M communications, management by projects, MR3000 product fleet management, automatic reporting and post-processing capabilities such as data categorization, data filtering, Fast Fourier Transform (FFT), visualization of events and continuous background monitoring and graphical comparison with widely spread standards (DIN4150, SN640312, BS5228, French regulation and NP2074)

In a willingness to have a fully open system, data ownership truly remains yours and therefore the new SCS includes easy data sharing features with automatic reporting, specific project access with reader or viewer rights and data export capabilities.

This release is the first milestone in the SCS development and we are looking towards the future with more user oriented solutions to come. Join our user community now, in order to contribute and benefits from new features very soon.

For any additional information, feel free to contact BARTEC SYSCOM.
