# MR3000BLA

## Blasting Monitoring

The MR3000BLA is a family of instruments dedicated to the monitoring of explosion-induced vibrations. It includes two devices: a portable unit for short-time measurements and a unit dedicated to permanent monitoring. The three channels for vibration and the channel for air overpressure make them perfect for a complete blasting monitoring.

The MR3000BLA devices are equipped with an embedded 4G module for wireless data transfer, and they can be linked with the SCS (Syscom Cloud Software) to offer a near real-time reporting solution with graphical norm comparison and alarming in case of norm exceedance.

### Market Applications

- Blasting monitoring
- Mining
- Quarrying

## MR3000BLA Blasting Monitoring

The MR3000BLA is a family of devices developed specifically for the monitoring of vibrations induced by explosions. The MR3000BLA offers 4 acquisition channels: 3 dedicated to vibrations and one to air overpressure. The MR3000BLA family includes two products:

- **MR3000BLA portable unit**, dedicated to short-term measurements, with integrated battery and carrying case;
- **MR3000BLA for permanent monitoring**, with Ethernet connection, GPS compatibility and external extensible antenna.

The trigger-based recording automatically acquires the blast event and the LCD screen displays the most useful related information (peak amplitudes, frequencies). For proper blast documentation, an automatic reporting with norm comparison is immediately generated and sent via e-mail by the Syscom Cloud Software (SCS).

### Major features

- Vibration and air pressure acquisition
- Calibration of the velocity sensor according to ISEE Specification for Blasting Seismographs (USA) or to DIN 45669-1 (Germany)
- External triaxial velocity sensor with measuring range  $\pm 250$  mm/s ( $\pm 10$  in/s) or  $\pm 100$  mm/s ( $\pm 4$  in/s)
- High pressure microphone with range up to 148 dB(L)
- Wi-fi connectivity
- Embedded 4G module
- Compatibility with Syscom Cloud Software (SCS) for data visualization and automatic blast event reporting

MR3000BLA for permanent monitoring

### Technical specifications

#### Data recording

<b>Resolution</b>	18 bits
<b>Sampling-rate</b>	1'000, 2'000 sps
<b>Number of channels</b>	4
<b>Recording principle</b>	Event recording (time history), continuous time recording, manual trigger
<b>Data memory</b>	Removable Industrial Grade SD Card
<b>Minimum trigger level</b>	0.1 mm/s (0.004 in/s)
<b>Trigger voting logic</b>	Predefined AND or OR combinations, individual channel votes
<b>Pre-event recording</b>	1 - 30 seconds (in 1 sec steps)
<b>Post-event recording</b>	1 - 100 seconds (in 1 sec steps)
<b>Alarm principle</b>	Multiple level triggers with many notification options (settable for each axis)
<b>File event format</b>	XMR/ASCII (if no microphone), ASCII (if microphone is present)

#### Connectivity

<b>Mobile Network</b>	Internal 4G modem, fallback 3G/2G
<b>Wi-fi access</b>	IEEE 802.11 b/g compliant
<b>LAN connectivity</b>	Available only for MR3000BLA for permanent monitoring

#### Physical characteristics

##### MR3000BLA portable unit

<b>Housing</b>	Peli box IP66, 420 x 331 x 170 mm (16.5 x 13.0 x 6.7 in), 6.4 kg
<b>Temperature/humidity</b>	-20° up to 60°C / Up to 100% RH

##### MR3000BLA for permanent monitoring

<b>Housing</b>	Aluminium IP65, 120 x 180 x 100 mm (4.7 x 7.1 x 3.9 in), 1.5 kg
<b>Temperature/humidity</b>	-20° up to 70°C / Up to 100% RH

#### External MS2003BLA triaxial velocity sensor

<b>Sensor type</b>	Triaxial geophone with linearized frequency response
<b>Calibration</b>	To be specified at the time of purchase between: <ul style="list-style-type: none"> <li>• ISEE: calibration according to ISEE Performance Specification for Blasting Seismographs</li> <li>• DIN: calibration according to DIN 45669-1</li> </ul>
<b>Measuring range full scale</b>	ISEE: $\pm 250$ mm/s ( $\pm 10$ in/s); DIN: $\pm 100$ mm/s ( $\pm 4$ in/s)
<b>Frequency range</b>	ISEE: 2-250 Hz; DIN: 1-315 Hz
<b>Dynamic range</b>	> 104 dB
<b>Linearity/Phase</b>	Class 1 (according to DIN 45669)
<b>Cross axis sensitivity</b>	<5% (according to DIN 45669)
<b>Dimensions/weight</b>	100 x 100 x 81 mm (3.9 x 3.9 x 3.2 in) / 1.0 kg
<b>Connector</b>	Cable gland with 1.5 m cable and LEMO 2K push-pull connector
<b>Accessories</b>	Mounting platform for short- or long-term monitoring, soft-soil spike

#### External high pressure microphone

<b>Sensor type</b>	Air pressure microphone - Array microphone
<b>Measuring range</b>	148 dB (L) $\pm 3$ dB
<b>Frequency range</b>	2-250 Hz
<b>Dimensions/weight</b>	60 mm length, 7 mm diameter / 5.5 g
<b>Connection</b>	LEMO coaxial push-pull connector with SMB socket 1.5 m

#### Power supply

##### MR3000BLA portable unit

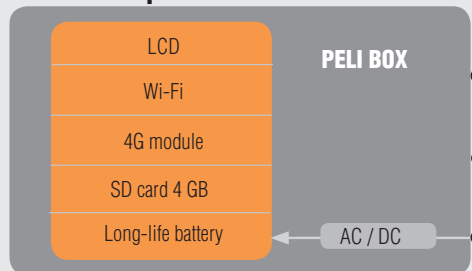

<b>Internal battery</b>	High capacity long life battery (> 3000 charge cycles), 5.3 Ah, 12 VDC
<b>AC power</b>	Internal AC/DC converter, 100-240 VAC, 50-60 Hz, with power LED indicator
<b>DC power</b>	10-36 VDC, with external AC/DC converter and cable to power grid

##### MR3000BLA for permanent monitoring

<b>Supply voltage</b>	9 to 13.5 VDC or 48 V PoE
-----------------------	---------------------------

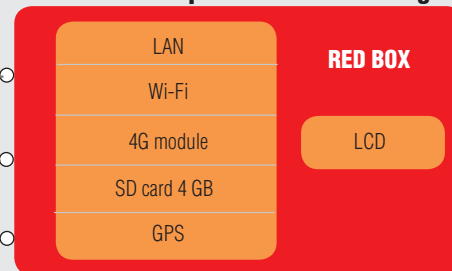

## Block diagram MR3000BLA

\* or DC power (10-36 VDC), with external AC/DC converter

### MR3000BLA for permanent monitoring

## Blast event report generated by the Syscom Cloud Software

### Blast report on SCS cloud software

The blast report is automatically created and sent to the user-defined contacts by the SCS Cloud Software. For more information, please refer to the SCS datasheet or to the Bartec Syscom website.

**SCS**  
scs.bartec-syscom.com

### Measurement information

All the details about the project and the measurement are shown on the top left part. If the user adds a comment in the SCS, this is automatically shown in the blast event report.

### Time histories

Visualization of 4 components:

- 3 for vibration
- 1 for air overpressure

### Summary table

Table with peaks and frequencies related to vibration and airpressure measurements. Additional information like vector sum and user comments is shown.

### Comparison with the standard curve

The velocity peaks calculated on the 3 axes are compared with the curve selected by the user (OSMRE, RI 8507, DIN 4150-3 and others).

## Ordering information

Description	Part number	Triaxial velocity meter	Overpressure microphone	AC power	DC power
-------------	-------------	-------------------------	-------------------------	----------	----------

### MR3000BLA portable unit

Example: **93106036-C-US-ISEE**

**Kits MR3000BLA portable unit with:** MR3000BLA recorder - integrated carrying case - internal battery - 4GB Memory - WiFi - Internal 4G module - Embedded web server for configuration and control - Triaxial velocity sensor MS2003BLA for horizontal mounting - Kit with mounting plate and spikes for velocity sensor

AC power (internal AC/DC converter), with microphone and accessories	93106036	X	X	X	
AC power (internal AC/DC converter), without microphone	93106038	X		X	
DC power, with microphone and accessories	93106042	X	X		X
DC power, without microphone	93106043	X			X
4G module for Europe, Middle East, Africa and Asia	A				
4G module for North America	B				
4G module for Australia, New Zealand and South America	C				
Cables to Swiss power grid	CH				
Cables to European power grid	EU				
Cables to US power grid	US				
Full range $\pm 100$ mm/s - DIN 45669-1 compliant	DIN				
Full range $\pm 250$ mm/s - ISEE Guidelines compliant	ISEE				

### MR3000BLA for permanent monitoring

Example: **93106047-A-EU-DIN**

**Kits MR3000BLA for permanent monitoring with:** MR3000BLA recorder - 4GB Memory - WiFi - Internal 4G module - Compatibility with external kit GPS - Embedded web server for configuration and control - 3m Ethernet cable - DC input - AC/DC converter - Mounting plate for MR3000BLA - Triaxial velocity sensor MS2003BLA horizontal mounting - Mounting plate for MS2003BLA for fixed installation - Overpressure microphone and accessories

With battery pack and related cables	93106047	X	X		X
Without battery pack	93106048	X	X		X
4G module for Europe, Middle East, Africa and Asia	A				
4G module for North America	B				
4G module for Australia, New Zealand and South America	C				
Cables to Swiss power grid	CH				
Cables to European power grid	EU				
Cables to US power grid	US				
Full range $\pm 100$ mm/s - DIN 45669-1 compliant	DIN				
Full range $\pm 250$ mm/s - ISEE Guidelines compliant	ISEE				

#### Accessories

Triaxial velocity sensor, full range $\pm 100$ mm/s	MS2003BLA-H-TRIA-100
Triaxial velocity sensor, full range $\pm 250$ mm/s (10 in/s)	MS2003BLA-H-TRIA-250
Microphone for air pressure 2-2000 Hz, 148 dB (L)	87000568
1.5m cable from MR to microphone	81000608
Windshield for microphone	87000569
Set of 3 mounting rods for microphone	13100013
Kit with mounting plate and set of spikes for velocity sensor	13100010
Power and other accessories	Refer to MR3000C
